About me During my bachelor in Sociology I discovered my interest for methods and statistics. Therefore, I started the master programme Methodology and Statistics for the Behavioural, Biomedical and Social Sciences. Within the programme there is the opportunity to enroll in the European Master in Official Statistics (EMOS), which I did. Currently, I am writing my thesis at Statistics Netherlands.

Experience

Jan 2018 - present, freelance

Helping students understand methodology and statistics, and/or working with SPSS or R.

May 2015 - present, Utrecht University

2020: Research assistant

2019: Lab assistant - Summer school: Structural Equation Modelling using Mplus.

2016: Research assistant - "Nieuwe Families in Nederland" - my main focus was data-processing and data-cleaning.

2015: Student assistant - This course was about deciding which statistical test is suitable for the data/research questions and how to perform these tests in SPSS.

Education

2018 - present, Utrecht University

MSc. Methodology and Statistics for the Behavioural, Biomedical and Social Sciences

2013 - 2017, Lorem ipsum dolor

BSc. Sociology

Skills

- Statistical Analysis
- Python
